Overview

We would like to welcome you to *Al-Zaytoonah DC* located on the luxurious *Washington DC*.

Here we would like to encourage the passion of learning found in every young aspiring student.

Mission:

- To create an intellectual environment based on opportunity and freedom to enrich and broaden the minds of the exceptional children of our world and instill them with an understanding of the world's history, cultures, and thought, to prepare them to become the pioneers of innovation and change in our future.

Grading

Grading is either a pass or a fail at the discretion of the annual $\uparrow \wedge \neq \square \nabla e \angle^\circ \angle^\circ$, which is a series of games that measure your ability. The format of the games is a closely guarded secret that changes every year. Some information about the school is also missing as a test to your ability. You loose one vacation period per failure.

Admissions/Aid

The interviewing process involves allowing students passing the preliminary hearing to come participate in the $\uparrow \wedge \boxtimes \cap \cup e \angle^\circ \angle^\circ$. All expenses are paid by the Sovereign Nation of Pangea.

Rules

Listen to the white silhouette robots (WSR) and HPAIL. The rules constantly improve themselves with the use of our extensive AI powered learning algorithms in order to always meet the everchanging needs of our student body.

Experience

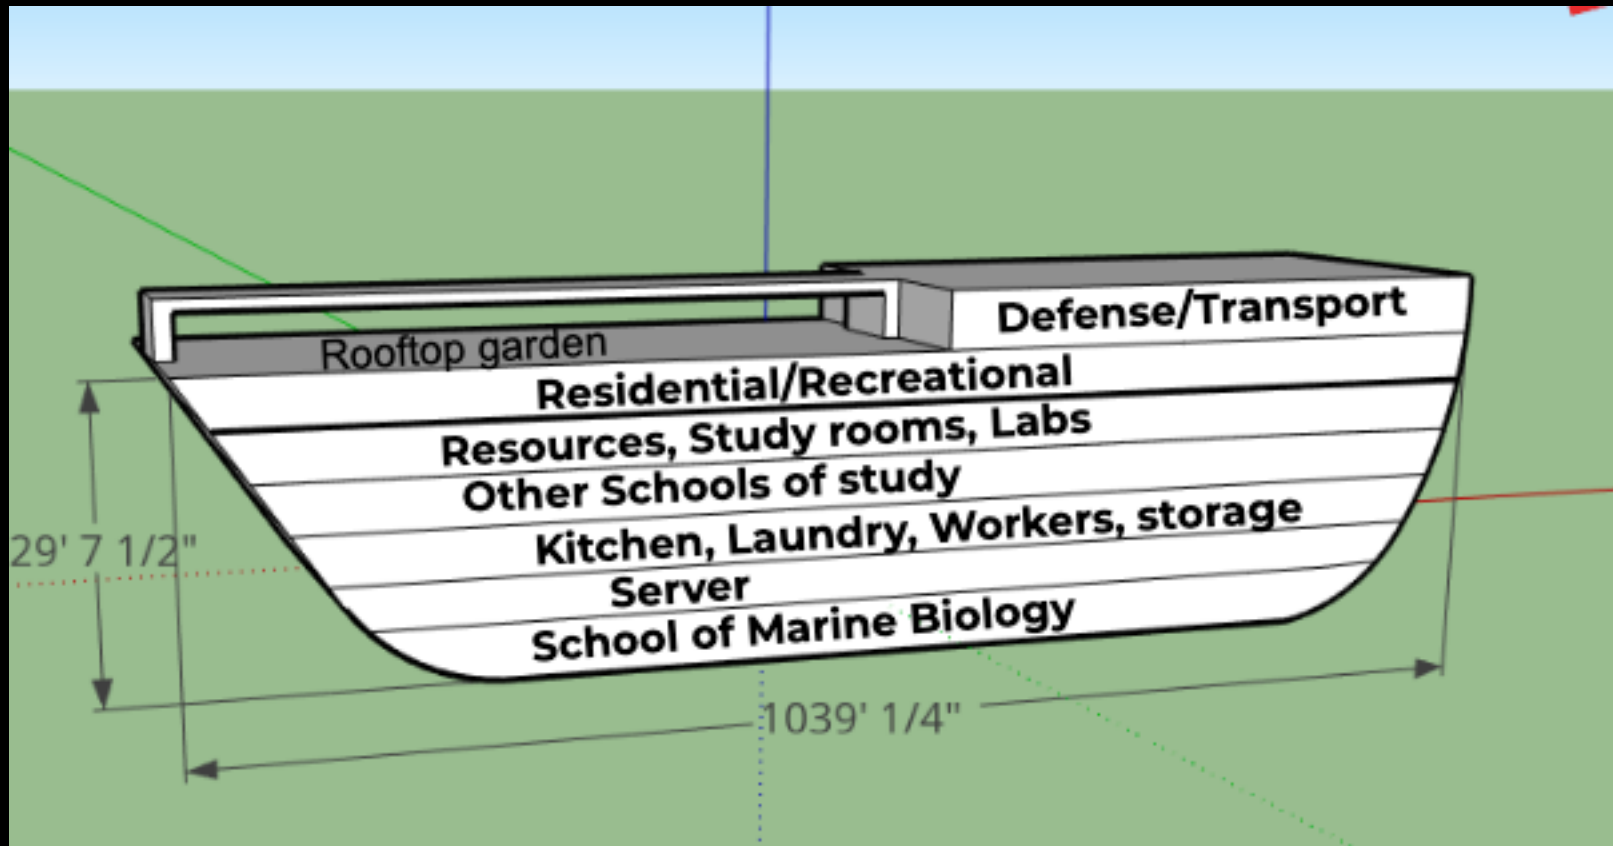

Students are leased passports once accepted providing them citizenship to the Sovereign Nation of Pangea for the duration of their study. The students learn in conjunction with other students, HPAIL, WSR, and the digital archive which allows the students to earn a PhD in 8 years with only an 8th grade experience.

Safety

Everything on our ship is controlled by a centralized AI system. If the ship detects need for evacuation, rods will immediately spike to the floor of the ocean to stabilize the ship while airplanes evacuate staff to safety. All of our data will be transported redundantly on two airplanes and boats.

Layout

- Our layout is classified for security purposes.
